EDUCATION

Babu Banarasi Das University ***Lucknow, UP***
B.Tech, Computer Science and Engineering | GPA: 8.18/10.0 ***Expected Graduation, August 2027***

OBJECTIVE

UI/UX Designer with hands-on UI/UX internship experience, skilled in user research, UX audits, wireframing, prototyping, and high-fidelity Figma design. Interested in solving real-world user problems through thoughtful, user-centered product experiences. Looking to contribute my design skills, frontend understanding, and strong learning mindset.

EXPERIENCE

UI/UX Design Intern: Kraftors AI&R, Lucknow ***On-site***
July'26-Sept'26

- Working on-site under the UI/UX lead at a 25–30 person startup, auditing existing product websites to identify usability gaps.
- Making direct design alterations to live interfaces, creating UI mockups and demo videos for live project and turning audit findings into implemented UI changes.

SKILLS

Design Tools: Figma (Wireframing, Prototyping, Design Systems), Adobe XD, Adobe Illustrator, Canva

Design Process: Design Thinking, User Flows, Information Architecture, Iterative Design, Mobile-First & Responsive Design, Micro-nteractions

UX Research: UX Audits, Usability Analysis, Usability Testing, User Behavior Analysis, User Empathy

Soft Skills: Storytelling, Presentation, Cross-functional Collaboration, Creativity, Rapid Iteration Work

PROJECTS

Healthians App Home Screen Redesign | Figma ***https://shorturl.at/vg6JH***

- I dentified a structural mismatch in the existing home screen, persuasion-first layout applied to a trust-sensitive health context, creating cognitive overload for already anxious users.
- Restructured information architecture by consolidating excess category scrolls, repositioning trust signals above the fold, and establishing a strict brand/neutral/accent color system.
- Refined overall visual hierarchy and layout to create a cleaner, more scannable experience.

Telegram Mobile Navigation Redesign ***https://shorturl.at/kygUj***

- Replaced hamburger menu with a persistent bottom navigation bar, reducing cognitive load and improving one handed usability.
- Designed 20+ reusable component library in Figma maintaining brand consistency and a uniform design system across all screen.
- Delivered high-fidelity prototypes with interaction flows to simulate real user journeys and validate design decisions

ACHIEVEMENTS

- **Beep School UX Hackathon:** Got shortlisted in top 15, advanced to the final Stage 2 (Visual Design round), earned LinkedIn-certified participation certificate.
- **Hackathons**: 2nd place in **"Vibe designing Hackathon"** organized by college and participated in multiple tech and design sprints organized by different organizations.
- **Volunteering:** Created digital posters, social media graphics, and web mockups for community events as **design volunteer** at **Google Developer groups Lucknow**. Learned to balance brand consistency with creative freedom while meeting deadlines
